The information below is the NBS Plus product entry for Triton Systems Triton Tri-Gel - Water Based DPC Gel.

Triton Tri-Gel - Water Based DPC Gel

Triton Tri-Gel - Water Based DPC Gel is a water-based and water soluble thixotropic gel, which diffuses naturally into damp substrates and reacts to form a water-repellent, vapour permeable, silicone resin network that allows walls to breathe.

The product is injected, using a cartridge gun or hand-operated compression pump, into 12 mm diameter holes drilled horizontally into the chosen mortar bed, at 100–120 mm centres or at perpend.

Suitable for professional and DIY use.
