

Equipment and requirements for on-site training

The following equipment will be required and should be available on site for any on-site training. The area on site for the purposes of training should be suitably cleared and prepared in advance. The following equipment will be required for your technicians both for the purposes of training and for all future installations of the Triton Systems products:

- All products to be on site in advance of training
- All products to be stored in strict accordance with their data sheets
- Data sheets and MSDS for products should be available on site
- Appropriate PPE – for site requirements and for products used in training
- Suitable platform to work at height where required
- Suitable electrical supply
- Access to clean potable water

For powder and liquid systems:

- Slow speed mixing paddles
- Suitable mixing vessels
- Suitable brushes, trowels or spray equipment
- Scales for weighing
- Volumetric vessels for mixing water / gauging solutions
- Suitably prepared and marked areas for application
- Tape measure
- Amenities to cleanse mixing paddles / trowels / brushes etc.

For cavity drain systems:

- Suitable drills
- Appropriate drill bits and numbers thereof (10mm / 8mm)
- Suitable flat face hammer
- 2m level / straight edge
- Suitable cutting equipment – Stanley knife / industrial scissors
- Tape measure

It is the responsibility of the contractor to ensure all the above equipment is available for the purposes of training as well as the products required.
