

Triton Sealing Plug

Part of a range of one-step seals for formwork spacers and pipes

The **Triton Sealing Plug** is designed to offer a more effective, quick and secure sealing solution than mastic or a length of water bar – both of which can be dislodged during the concrete pour.

The 22mm standard sized plugs are simply hammered in either or both ends of the formwork spacer. The swellable rubber cap prevents water infiltrating the spacer and the solid core provides a mechanical anchor under water pressures up to 6 bar.

Size: 22mm
Supplied in: Bags of 100

Quick and easy installation

Position the Sealing Plug in the formwork spacer

Hammer the Sealing Plug into the formwork spacer

No additional finishing or after-treatment required
