

### Triton Sealing UFO

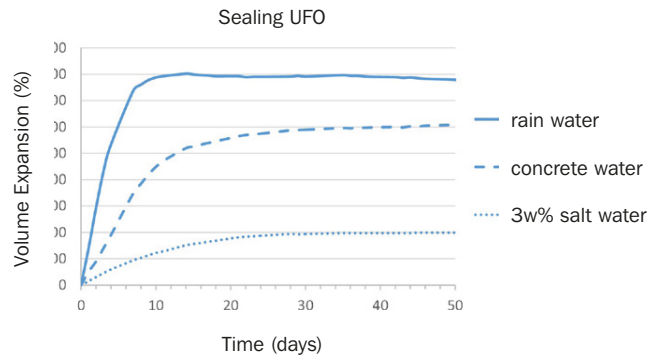

Part of a range of one-step seals for formwork spacers and pipes

The **Triton Sealing UFO** is designed to offer a more effective, quick and secure sealing solution than mastic or a length of water bar – both of which can be dislodged during the concrete pour.

A hydrophilic ring made from synthetic, water-swellaable rubber that fits securely around the formwork spacer and prevents water infiltrating through cracks in the surrounding concrete.

Size: 24mm  
Supplied in: Bags of 100
