

Triton Pipe Strap

Part of a range of one-step seals for formwork spacers and pipes

The **Triton Pipe Strap** is designed to offer a more effective, quick and secure sealing solution than mastic or a length of water bar – both of which can be dislodged during the concrete pour.

Designed to provide a secure seal around pipes installed through concrete floors or walls, the Triton Pipe Strap should be fixed around the pipes before the steel reinforcements are put in place. Easy to fit and tighten using the mechanical fastener, the straps can be used to seal around all pipes between 110 – 125mm diameter.

Size: To fit pipes between 110mm to 125mm

Supplied: As single units

Pipe Strap Application

Avoid the following ineffective installations
